***SEE WHAT YOU  
CAN DO NO***

**W.**

## ***COVER ALL THE ANGLES.***

Whether you use them to excavate footings, load trucks, set stone, place pipe, or many other jobsite duties, the 210G and 210G LC can make easy work out of any task. Customer-inspired improvements include Powerwise Plus™ technology to boost performance on demand. Control pattern-change valve that eases operation — now standard. Updated cab comforts. Plus options such as hydraulic single-pedal propel system, deluxe LED lighting, and flexible grade-management solutions. These are just some of the ways these accomplished excavators have you covered.

# YOUR BEST IDEAS

NOW THERE'S EVEN MORE TO LIKE.

We've upgraded our popular 210G/210G LC Excavators to include valuable input from customers just like you. Read on to find out how we put your ideas to work.

## Keep it clean

Optional rotary precleaner pulls clean air into the system — a must in harsh jobsite conditions.

## Control pattern

Control pattern-change valve is now a standard feature instead of a field-kit option.

## Waste not

Auto-idle speed can be lowered to a more fuel-efficient 800 rpm.

## Performance plus

Powerwise Plus technology delivers fuel-efficient power when you need it.

## Going forward

Hydraulic single-pedal propel system enables simplified straight-line machine tracking without the need to engage both hand levers or both foot pedals.

**SET AUTO-IDLE  
TO 800 RPM TO  
CONSERVE  
FUEL**

# **GRADE-MANAGEMENT SOLUTIONS.**

## ***FLEXIBLE SOLUTIONS THAT FIT YOUR BUSINESS*** *UNLEASH THE POWER OF GRADE CONTROL.*

John Deere offers an economical way to adopt grade-management technology for excavators by providing an easy path for future upgrades. This gives you the flexibility to find the right solution, whether you're looking at this technology for the first time or are interested in a premium solution. Choose entry-level, economical Excavator Grade Guidance or opt for fully integrated SmartGrade™.

**[GOGRADE.DEERE.COM](https://gograde.deere.com)**  
PROVIDES MOBILE-FRIENDLY  
SETUP & OPERATION

#### **Make good grades**

Deere grade-control solutions help reduce labor, enhance speed, and save on material compared to excavators without grade-management technology. And they help operators of all experience levels to achieve excellent results.

#### **Fully supported**

Our grade-management solutions come factory ready and are backed by your John Deere dealer, including service, warranty, upgrades, and financing.

#### **Grade Guidance**

Entry-level Grade Guidance arms operators with elevation and position of bucket cutting-edge relative to target plane (2D) or design surface (3D). It's perfect for precision excavation projects, including digging trenches for pipes, shaping ditches or slopes, or excavating structure foundations.

#### **SmartGrade**

Fully integrated SmartGrade provides 3D control. The operator controls the arm as the machine automatically controls the boom and bucket. Additional features include overdig protection and in-cab real-time distance to target.

## ***THE COMFORT ZONE***

***GET IN TOUCH WITH PRODUCTIVE OPERATION.***

Refined LCD monitor employs a rotary control that makes it quick and easy to tap into an abundance of performance and convenience functions and features. Single-pedal propel keeps the machine moving straight forward. Operators will also appreciate the quiet and spacious cab, expansive visibility, and numerous other amenities that provide what your operators need to do their best work.

3-WAY ADJUSTABLE  
**PREMIUM  
LEATHER SEAT**  
(OPTIONAL)

#### **Dial it up**

Multi-language LCD monitor and rotary dial provide intuitive access to a wealth of information and functions. Just turn and tap to select work mode, access operating info, check maintenance intervals, source diagnostic codes, adjust cab temperature, and tune the radio. A USB port helps keep your devices charged.

#### **Take control**

Ergonomically correct short-throw pilot levers provide smooth, predictable fingertip control with less movement or effort. Push buttons in the right lever allow predictable control of auxiliary hydraulic flow for operating attachments. Optional sliding auxiliary-function lever\* provides proportional speed control, giving you full command at your fingertips.

#### **Calm, cool, and collected**

Automatic, high-velocity bi-level climate control system with automotive-style adjustable louvers helps keep the glass clear and the cab comfortable.

#### **Single-pedal propel**

Hydraulic single-pedal propel system moves the machine when and where you need it to without having to engage both foot pedals or both hand levers.

#### **We've got your back**

Sculpted mechanical-suspension high-back seat with 12.5 inches of travel slides together or independent of the joystick console, so it won't cramp an operator's style. Opt for a premium air-suspension leather seat that adjusts three ways, is thermally heated and actively cooled, and includes a high-visibility retractable orange seat belt.

#### **Put some light on it**

Optional deluxe LED lights at cab front and rear, boom, and toolbox illuminate when your workday extends beyond daylight. They use less power, output more light, and last longer compared to halogen lights.

\*Auxiliary-function lever is not available with Grade Guidance or SmartGrade Excavators.

# **RUGGED AND RELIABLE**

## **NOTHING IS BUILT LIKE THESE DEERE MACHINES**

Conditions can be tough on the jobsite. So we equipped the 210G/210G LC with some equally tough features. Double-seal swing bearing that delivers rock-solid durability. Mainframe single-sheet undercover thickened for added strength. Options like a track-frame undercover to keep debris from accumulating and a rotary precleaner that pulls clean air into the system no matter how foul it is outside. When you know how they're built, you'll see how rugged these machines are.

### **Stress resistance**

A John Deere exclusive, three welded bulkheads within the boom resist torsional stress. Booms, arms, and mainframes are so tough, they're warranted for three years or 10,000 hours.

### **Pattern of protection**

Standard control pattern-change valve and fuel shutoff are well protected yet conveniently accessible at ground level.

### **TK-Series bucket teeth**

Standard TK-Series bucket teeth are engineered for strength and impact absorption. Hammer-free installation and removal simplifies changes and minimizes downtime.

### **Cooler core cleanout**

Highly efficient, hydraulically driven fans run only as fast as needed, reducing noise, fuel consumption, and operating costs. Reversing option automatically back-blows cooler cores to help keep them clean.

### **Designed for durability**

Reinforced D-channel side frames with recessed doors provide maximum cab and component protection. Standard mainframe and optional track-frame undercovers provide an extra layer of defense.

### **FT4 engine technology**

To meet stringent EPA Final Tier 4 (FT4)/EU Stage IV standards, we built on our Interim Tier 4 (IT4)/Stage IIIB solution to deliver the best combination of performance, efficiency, and reliability without sacrificing power or torque. Our field-proven technology is simple, fluid efficient, fully integrated, and fully supported. It employs cooled exhaust gas recirculation (EGR), easy-to-maintain high-uptime exhaust filters, and selective catalytic reduction (SCR).

JOHN DEERE

210G LC

# READY TO WORK

UNCOVER ALL THE WAYS WE KEEP COSTS DOWN.

## DEF access

With a large and accessible tank, diesel exhaust fluid (DEF) can be conveniently filled when refueling. DEF overflow routes excess outside the machine to avoid paint damage.

## Refill 'er up

Large fuel tank and 500- and 5,000-hour engine and hydraulic oil-service intervals decrease downtime for routine maintenance compared to models with shorter-hour service requirements. Fluid-level sight gauges are conveniently located and can be checked at a glance.

## Easy filter maintenance

Vertical spin-on fuel and engine oil filters are positioned in the right rear compartment for simplified ground-level servicing.

## FT4 ash service

Ash-service intervals for the diesel particulate filter (DPF) are condition based, with the machine notifying the operator before service is required. Typically, ash service is not necessary until the first engine overhaul depending on machine application and maintenance practices.

## Fuel savers

Auto-idle automatically reduces engine speed to as low as 800 rpm when hydraulics aren't in use. Auto-shutdown further conserves precious fuel and machine hours.

## ***PRECISION CONSTRUCTION TECHNOLOGY***

This suite of construction technology delivers **Productivity Solutions** to help you get more done, more efficiently. The in-base, five-year JDLink™ telematics subscription provides machine location, utilization data, and alerts to help you maximize productivity and efficiency. Other productivity solutions include grade-management options for multiple machine forms and payload weighing for wheel loaders and articulated dump trucks.

To maximize uptime and lower costs, JDLink telematics also enables **John Deere Connected Support.**™ John Deere's centralized Machine Health Monitoring Center analyzes data from thousands of connected machines, identifies trends, and develops recommended actions, called Expert Alerts, to help prevent downtime. Dealers use Expert Alerts to proactively address conditions that may otherwise likely lead to downtime. Your dealer can also monitor machine health and leverage remote diagnostics and programming capability to further diagnose problems and even update machine software without a time-consuming trip to the jobsite.

# 210G LC SPECIFICATIONS

<b>Engine</b>	<b>210G / 210G LC</b>		
	<b>Base engine for use in U.S., U.S. Territories, and Canada</b>		
Manufacturer and Model	John Deere PowerTech™ PVS 6.8L 6068HT106		
Non-Road Emission Standard	EPA Final Tier 4/EU Stage IV		
Net Rated Power (ISO 9249)	119 kW (159 hp) at 2,000 rpm		
Cylinders	6		
Displacement	6.8L (415 cu. in.)		
Off-Level Capacity	70% (35 deg.)		
Aspiration	Turbocharged, air-to-air charge-air cooler		
<b>Cooling</b>			
	Cool-on-demand hydraulic-driven, suction-type fan with remote-mounted drive		
<b>Powertrain</b>			
	2-speed propel with automatic shift		
<b>Maximum Travel Speed</b>			
Low	3.5 km/h (2.2 mph)		
High	5.5 km/h (3.4 mph)

## 210G Lift Capacities

**Boldface type** indicates hydraulically limited capacity; lightface type indicates stability-limited capacities, in kg (lb.). Ratings at bucket lift hook; machine equipped with 666-kg (1,468 lb.) bucket, standard counterweight, and standard gauge; and situated on firm, level, uniform supporting surface. Total load includes weight of cables, hook, etc. Figures do not exceed 87 percent of hydraulic capacities or 75 percent of weight needed to tip machine. All lift capacities are based on ISO 10567 (with power boost).

# 210G / 210G LC

## 210G LC Lift Capacities

**Boldface type** indicates hydraulically limited capacity; lightface type indicates stability-limited capacities, in kg (lb.). Ratings at bucket lift hook; machine equipped with 666-kg (1,468 lb.) bucket, standard counterweight, and standard gauge; and situated on firm, level, uniform supporting surface. Total load includes weight of cables, hook, etc. Figures do not exceed 87 percent of hydraulic capacities or 75 percent of weight needed to tip machine. All lift capacities are based on ISO 10567 (with power boost).

## Buckets 210G / 210G LC

A full line of buckets is offered to meet a wide variety of applications. Digging forces are with power boost. Buckets are equipped with John Deere TK-Series Bucket Teeth standard. Replaceable cutting edges and a variety of teeth are available through John Deere Parts. Optional side cutters add 150 mm (6 in.) to bucket widths. Capacities are SAE heaped ratings.

Type Bucket	Bucket Width		Bucket Capacity		Bucket Weight		Bucket Dig Force		Arm Dig Force 2.91 m (9 ft. 7 in.)		Bucket Tip Radius		Number of Teeth

### Bucket Selection Guide\*

\* Contact your John Deere dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Does not include optional equipment such as thumbs or couplers. Larger buckets may be possible when using light materials, for flat and level operations, less compacted materials, and volume loading applications such as mass-excavation applications in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications, rocks, and uneven surfaces. Bucket capacity indicated is SAE heaped.

# Additional equipment

Key: ● Standard ▲ Optional or special

See your John Deere dealer for further information.

210G / 210G LC	Engine
●	Auto-idle system
●	Automatic belt-tension device
●	Batteries (2 – 12 volt)
●	Coolant recovery tank
●	Dual-element dry-type air filter
●	Electronic engine control
●	Enclosed fan guard (conforms to SAE J1308)
●	Engine coolant to –37 deg. C (–34 deg. F)
●	Fuel filter with water separator
●	Fuel shutoff valve
●	Full-flow oil filter
●	Turbocharger with charge air cooler
●	Cool-on-demand hydraulic-driven fan
●	500-hour engine-oil-change interval
●	70% (35 deg.) off-level capability
●	Engine-oil-sampling valve
●	Programmable auto shutdown
▲	Chrome exhaust stack
▲	Severe-duty fuel filter
▲	Hydraulic fan reverser
▲	Engine coolant heater
▲	Engine air precleaner
<b>Hydraulic System</b>	
●	Reduced-drift valve for boom down, arm in
●	Auxiliary hydraulic valve section
●	Spring-applied, hydraulically released automatic swing brake
●	Auxiliary hydraulic-flow adjustments through monitor
●	Auto power lift
●	5,000-hour hydraulic-oil-change interval
●	Hydraulic-oil-sampling valve
●	Control pattern-change valve
●	Powerwise Plus™ hydraulic-management system
▲	Auxiliary hydraulics with combination piping
▲	Auxiliary pilot and electric controls
▲	Hydraulic filter restriction indicator kit
▲	Load-lowering control device
▲	Single-pedal propel control
<b>Undercarriage</b>	
●	Planetary drive with axial piston motors
●	Propel motor shields
●	Spring-applied, hydraulically released automatic propel brake
●	Track guides, front idler and center
●	2-speed propel with automatic shift
●	Upper carrier rollers (2)
●	Sealed and lubricated track chain
●	Heavy-duty undercover
▲	Triple semi-grouser shoes, 600 mm (24 in.)

210G / 210G LC	Undercarriage (continued)
▲	Triple semi-grouser shoes, 700 mm (28 in.)
▲	Triple semi-grouser shoes, 800 mm (32 in.)
<b>Upperstructure</b>	
●	Right-hand and left-hand mirrors
●	Vandal locks with ignition key: Cab door / Service doors / Toolbox
●	Debris screen in side panel
●	Remote-mounted engine oil and fuel filters
●	Service handrails
<b>Front Attachments</b>	
●	Centralized lubrication system
●	Dirt seals on all bucket pins
●	Less boom and arm
●	Oil-impregnated bushings
●	Reinforced resin thrust plates
●	Tungsten carbide thermal coating on arm-to-bucket joint
▲	Arm, 2.91 m (9 ft. 7 in.)
▲	Attachment quick-couplers
▲	Boom cylinder with plumbing to mainframe for less boom and arm
▲	Buckets: Heavy duty / Side cutters and teeth
▲	Material clamps
▲	Super-long fronts
<b>Operator's Station</b>	
●	Meets ISO 12117-2 for ROPS
●	Adjustable independent-control positions (levers-to-seat, seat-to-pedals)
●	AM/FM radio
●	Auto climate control/air conditioner/heater/pressurizer
●	Built-in Operator's Manual storage compartment and manual
●	Cell-phone power outlet, 12 volt, 60 watt, 5 amp
●	Coat hook
●	Standard cloth seat, mechanical suspension, with 100-mm (4 in.) adjustable armrests
▲	Deluxe heated cloth seat, air suspension, with 100-mm (4 in.) adjustable armrests
▲	Premium thermally heated and actively cooled leather seat
●	Retractable seat belt, 76 mm (3 in.) (conforms to SAE J368)
●	Floor mat
●	Front windshield wiper with intermittent speeds
●	Gauges (illuminated): Diesel Exhaust Fluid (DEF) / Engine coolant / Fuel
●	Horn, electric
●	Hourmeter, electric
●	Hydraulic shutoff lever, all controls

210G / 210G LC	Operator's Station (continued)
●	Hydraulic warm-up control
●	Interior light
●	Large cup holder
●	Machine Information Center (MIC)
●	Mode selectors (illuminated): Power modes (3) / Travel modes (2 with automatic shift) / Work mode (1)
●	Multifunction, color LCD monitor with: Diagnostic capability / Multiple-language capabilities / Maintenance tracking / Clock / System monitoring with alarm features: Auto-idle indicator, engine air cleaner restriction indicator light, engine check, engine coolant temperature indicator light with audible alarm, engine oil pressure indicator light with audible alarm, low-alternator-charge indicator light, low-fuel indicator light, low DEF indication with audible alarm, fault code alert indicator, fuel-rate display, wiper-mode indicator, work-lights-on indicator, and work-mode indicator
●	Motion alarm with cancel switch (conforms to SAE J994)
●	Power-boost switch on right console lever
●	Auxiliary hydraulic control switches in right console lever
●	SAE 2-lever control pattern
●	Tinted glass
●	Transparent tinted overhead hatch
●	Hot/cold beverage compartment
●	USB charging port
▲	Hydraulic oil filter restriction indicator light
▲	Protection screens for cab front, rear, and side
▲	Window vandal-protection covers
<b>Grade Control</b>	
▲	Grade Guidance, factory integrated
▲	SmartGrade™ Ready including 2D grade control
▲	SmartGrade 3D grade control
<b>Electrical</b>	
●	100-amp alternator
●	Blade-type multi-fused circuits
●	Positive-terminal battery covers
●	JDLINK™ wireless communication system (available in specific countries; see your dealer for details)
●	Rearview camera
▲	Cab extension wiring harness
<b>Lights</b>	
●	Work lights: Halogen / 1 mounted on boom / 1 mounted on frame
▲	LED light kit: 2 lights mounted on cab front / 1 mounted on cab rear / 1 mounted on boom / 1 mounted in toolbox

While general information, pictures, and descriptions are provided, some illustrations and text may include product options and accessories NOT AVAILABLE in all regions, and in some countries products and accessories may require modifications or additions to ensure compliance with the local regulations of those countries.

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan, at test conditions specified per ISO 9249. No derating is required up to 3050-m (10,000 ft.) altitude. Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on units with 1065-mm (42 in.), 0.91-m<sup>3</sup> (1.19 cu. yd.), 886-kg (1,951 lb.) general-purpose buckets; 2.91-m (9 ft. 7 in.) arms; 4250-kg (9,370 lb.) counterweights; 800-mm (32 in.) triple semi-grouser shoes; full fuel tanks; and 79-kg (175 lb.) operators.
